### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: no prior art of record or combination thereof teaches a "resin composition comprising a thermosetting resin and a filler dispersed in the thermosetting resin, wherein a particle size curve of the filler has a small-diameter peak, a large-diameter peak having a higher frequency than that of the small-diameter peak, and a valley which is positioned between the small-diameter peak and the large-diameter peak and has a lower frequency than that of the small-diameter peak, and wherein a frequency ratio of the valley to the large-diameter peak is 0.08 or less."

Closest related art found was U.S. Patent Number 5,610,219 to Takatani, et al. Takatani, et al, discloses a resin compound comprising an epoxy resin and a filler wherein the filler has a plurality of spherical particle sizes wherein the frequency of those particles is directly proportional to the weight, i.e. the larger the particles, the larger the frequency. However, applicant claims ONLY large and small particles to ensure that the resin composition embodying the invention is enabled to easily penetrate into gaps between turns of a coil wire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2832
